PREVIOUS WORK

Northern Ballet | 2014 - 2022

- Became a successful soloist performer, highly regarded for beautiful qualities as both a dancer and an artist
- Brought creative inspirations to the team
- Hosted events with audience using excellent presentation and public speaking skills
- Selected to be featured in the films for Sky Arts and DVD releases

PROFILE

An adventurous web developer from Japan, with 8 years of experience as a professional ballet dancer, who is passionate about building innovative projects and continue evolving in a different form of art. Excellent at organising, planning and presenting to the audience.

PROJECTS

MyFlix

Users can create an account, browse listed movies and add to favourites.

- Defined RESTful API endpoints using Node.js and Express
- Created non-relational database and modelled logic for interacting with it
- Implemented authentication & authorization using Passport
- Tested the API endpoints using Postman, hosted the server-side application on Heroku
- Built two different single-page, responsive application, one using React and the other Angular.

[Demo \(React\)](#)

[Demo \(Angular\)](#)

[Code \(server\)](#)

[Code \(client-React\)](#)

[Code \(client-Angular\)](#)

[Case study](#)

Meet App

Users can search for a city and get a list of events hosted in that city.

- Wrote user stories and translated them into multiple test scenarios
- Set up an OAuth client and obtained AWS credentials
- Wrote and tested Serverless functions (Unit & Integration & Acceptance & End-to-End Testing)
- Set up for Application Performance Monitoring (integrating Atatus)
- Created responsive user interface using React with Object Oriented Programming
- Added scatter & pie chart to visualize data using the recharts library
